

Message from Editorial Desk

25th March 2023

Dear Readers,

We are delighted to announce the upcoming release of the third issue of the International Journal of Engineering Research and Sustainable Technologies (IJERST). As we continue our mission to advance engineering research and sustainable technologies, we are excited to present a diverse collection of groundbreaking articles, insightful research findings, and innovative solutions to pressing global challenges.

We are pleased to inform you that IJERST is now in the process of applying for Digital Object Identifiers (DOIs) for our articles. Obtaining DOIs is essential for indexing purposes, providing each published article with a permanent and unique identifier. This ensures the citability and accessibility of our articles over time, enhancing the credibility and reliability of our journal. This step reaffirms our commitment to excellence in scholarly communication.

We extend our heartfelt gratitude to our esteemed authors, dedicated reviewers, and supportive editorial board members for their invaluable contributions to IJERST. Your dedication to advancing engineering research and sustainable technologies is truly commendable, and we are honored to feature your work in our journal.

We invite our readers to explore the upcoming third issue of IJERST, where you will discover a wealth of knowledge, innovation, and inspiration. Together, let us continue to push the boundaries of engineering research and pave the way towards a more sustainable future.

Thank you for your continued support and enthusiasm for IJERST.

Warm regards,

On behalf of Editorial Team

Dr.V.RameshBabu
