

Message from Editorial Desk

25th June 2024

Dear Readers, Researchers, and Contributors,

We are pleased to present the latest issue of the **International Journal of Engineering Research and Sustainable Technologies (IJERST)**, Volume 2, No. 2, 2024. This edition showcases cutting-edge research and innovative contributions in the field of engineering and sustainable technologies from scholars across the globe. We continue our mission of fostering knowledge-sharing and interdisciplinary dialogue to advance sustainable solutions for engineering challenges in a rapidly evolving world.

Our journal's commitment to high standards of quality and academic integrity remains steadfast. In this regard, I am excited to inform you that we are making significant progress toward obtaining **DOI (Digital Object Identifier)** numbers for all our published articles. The DOI integration will not only enhance the visibility of the research work published in IJERST but also provide greater accessibility, reliability, and citation indexing for our contributors.

In addition to these developments, we are actively pursuing **inclusion in UGC-CARE (Consortium for Academic and Research Ethics)**, ensuring our journal's alignment with the standards required for quality research publications. We understand the importance of this recognition for our contributors and readers and are dedicated to achieving this milestone in the near future.

Our team is also planning several initiatives aimed at enhancing the scope and reach of the journal, including webinars, special issues on trending topics, and collaborations with leading academic institutions. These activities are part of our ongoing effort to ensure that IJERST continues to serve as a valuable resource for researchers, engineers, and professionals working towards sustainable development.

We sincerely thank all the authors, reviewers, and editorial board members for their contributions and dedication. Together, we are building a platform that not only highlights innovative research but also supports the global engineering community in its pursuit of sustainability.

Thank you for your continued support, and we look forward to your valuable submissions and feedback for future issues.

Warm regards,

On behalf of Editorial Team

Dr.V.RameshBabu
