

Message from Editorial Desk

25th December 2024

Dear Readers, Researchers, and Contributors,

We are pleased to present the latest edition of the *International Journal of Engineering Research and Sustainable Technologies (IJERST)*, Volume 2, No. 4, 2024. This issue continues our mission of highlighting pioneering research and innovative solutions in engineering and sustainability from distinguished scholars worldwide.

Our Patron, Er. A. C. S. Arun Kumar, has been the driving force behind this journal and the many others launched under Pen2Mind Publishing. We sincerely thank him for his vision, guidance, and unwavering support—both in resources and expertise—that have enabled us to reach new heights. Exciting developments are underway as we move toward becoming a Crossref member. With continued support from our management and editorial team, we are making significant progress. Future editions will feature DOI assignments for all past and forthcoming articles, enhancing their accessibility and citation impact.

This edition showcases a diverse range of research contributions that not only advance engineering knowledge but also emphasize the urgency of sustainable practices in an ever-evolving technological landscape. We remain committed to academic excellence, and to further this commitment, we are actively working on expanding the journal's presence through partnerships with leading academic databases and platforms.

Looking ahead, we plan to introduce thematic special issues, interactive online forums, and collaborative projects with esteemed universities and research institutions. These initiatives aim to foster interdisciplinary dialogue and drive impactful real-world solutions.

We extend our sincere appreciation to all our authors, reviewers, and editorial board members for their continuous dedication and support. Your contributions are vital to shaping a strong and dynamic research community.

Thank you for your readership, and we encourage you to submit your valuable research for future issues. Together, we can continue to push the boundaries of engineering innovation and sustainability.

Warm regards,

On behalf of Editorial Team

Dr.V.RameshBabu
